

The Report Viewer

The Report Viewer allows you to view a report, export content to various output formats, and apply formatting, sorting, and filters to control how the data is displayed.

To open a report in the Report Viewer, complete the following steps:

1. In the **Library** or the **Repository**, locate your report.
2. Click the report name, or right-click the report name and select **Run** from the context-menu. In the **Repository**, you can also click the report row and select **Run** from the tool bar. The report will open in the **Report Viewer**.
